

z/TPF Pre-Migration Analysis Offering

◆ Offering

- ◆ Analyze the current environment and identify areas of focus for z/TPF migration.
- ◆ May result in the creation of an initial Project Plan, definition of the tasks required for systems and environment preparation, assistance in establishing and validating the initial z/TPF development environment , as well as providing guidance on Source Control Managers for the z/TPF.

◆ Analysis Phases

◆ Assessing the Current Environment

- ◆ Hardware
- ◆ System
- ◆ Communications
- ◆ Operations
- ◆ Development Environment
- ◆ Source Control/Change Management
- ◆ Source Code
- ◆ Linux System

◆ Defining the z/TPF Environment

- ◆ Production
- ◆ VM Test
- ◆ z/OS
- ◆ Source Control
- ◆ Linux Build

◆ Gap Analysis

- ◆ What needs to be done to the current TPF 4.1 systems prior to migration?

◆ Implementation Planning

- ◆ Create a capital spending plan for any hardware and software that needs to be acquired
- ◆ Create a project plan that details the migration.
